DETAILED ACTION

1. Claims 1-74, 76 have been canceled.
Claims 75, 77-79 have been amended and claims 80-86 have been added.
2. Claims 75, 77-86 are under examination.
3. The text of those sections of Title 35 U.S.C. code not included in this office action can be found in a prior Office Action.
4. The following Office Action contains NEW GROUNDS of rejection.

Information Disclosure Statement

5. The IDS filed 6/21/01 has been considered but the date of reference CCCC is needed to complete the reference.

Rejections Withdrawn

6. The rejection of claims 75-79 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in view of the amendments to the claims.
7. The rejection of claims 33, 73-79 under 35 U.S.C. 102(a) as being anticipated by Huston et al (WO 93/16185, published 8/19/93) is withdrawn in view of the evidence that the claims are granted the priority date of 2/6/92.

Response to Arguments

8. The rejection of newly amended claim 75 and newly added claim 80-82 under 35 U.S.C. 112, first paragraph is maintained.

The response filed 10/28/04 has been carefully considered but is deemed not to be persuasive. The response states that sequences displaying 90% sequence identity to the specific CDRs are indeed enabled and as such the specification teaches methods for producing protein that are 90% and techniques for modifying sequences and assays for binding (see page 8-9 of response). In response to this argument, while one can make the modifications and may be able to screen modifications, as evidenced from Rudikoff and Colman it is unpredictable what residues to alter in the CDRs and obtain an antibody that binds. It is not routine to screen a myriad of mutants to try to obtain an antibody that may bind. In fact it is unpredictable whether one can alter the CDRs and obtain a binding antibody at all. The specification does not teach such alterations or what residues to substitute for those of the CDRS in the antibody and obtain a functioning antibody.

Conclusion

Art Unit: 1642

9. Claims 77-79, 83-86 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
